

PRESS ANNOUNCEMENT

The Company Officially Launches Next-Generation Supernova TOPCon Solar Panels

Bringing premium, high-performance and affordable renewable energy to the local market

A MAJOR COMMERCIAL MILESTONE

The Supernova Solar Panels launch marks a major commercial milestone achieved through strategic partnerships with top industry manufacturers.

Advanced Technology, Accessible Value

By leveraging long-standing strategic alliances with world-class manufacturers, the Company successfully bridges the gap between high-end engineering and cost-effectiveness. The integration of advanced TOPCon (Tunnel Oxide Passivated Contact) technology represents a significant leap forward, offering superior low-light performance, higher cell efficiency, and better long-term reliability compared to standard panels. This highly anticipated product line delivers an unparalleled combination of maximum power output, modern aesthetics, and exceptional affordability for both residential and commercial consumers.

Premium Construction. Built for Local Conditions.

The Supernova Series combines elite Tier 1, A-grade solar cells with sleek, polished, semi-tempered glass. This design ensures industry-leading efficiency and an elegant visual appeal while resisting harsh environmental conditions. Engineered specifically to meet the high-performance standards and unique climate demands of the local market, these panels offer guaranteed premium quality without the premium price tag.

Strengthening Market Position

The introduction of the Supernova TOPCon Solar Panel Series marks a major commercial milestone for synergistic alliances with premier global manufacturers, fulfilling the Company's commitment to meet local demand for top-tier renewable energy. We believe that transitioning to sustainable energy should be both highly efficient and economically viable for every home and business.

Driving Sustainable Growth

This strategic launch significantly strengthens the Company's position within the rapidly growing renewable energy sector, positioning it to capture a larger market share. By aligning core operations with this high-growth industry, the Company is uniquely structured to seize emerging commercial opportunities and expand its customer base. Ultimately, this enhanced competitive standing is projected to optimize long-term financial performance and establish reliable, diversified future revenue streams.

SUPER-NOVA TOPCon | Premium performance. Smarter energy. Greater value.
